SUMMARY

Motivated software engineer specializing in fullstack development, backend systems, and API integration. Skilled in **Python**, **React**, **Docker**, and **Flutter**, with experience in cloud infrastructure and AI integration. Known for adaptability and a proven track record in delivering high-quality features on tight timelines.

SKILLS

Languages & Frameworks: Python, JavaScript, Flutter, Node.js, Flask, React

Cloud & DevOps: Docker, GitHub Actions, CloudMagic, Firebase, GCP, AWS

Databases: SQL, NoSQL (Firebase, MongoDB)

AI & Machine Learning: Explainable AI, Grad-CAM, Computer vision

EXPERIENCE

Fullstack Engineer

DevisionX

Dec. 2024 – Present

- Develop and maintain scalable web applications using **Flask** for backend and **React.js** for frontend.
- Utilize **AWS**, **Firebase**, and **GCP** for deploying, monitoring, and scaling services, ensuring high availability and fault tolerance.

Freelance Developer

Upwork & Freelancer.com

Sep. 2021 – Present

- Built APIs and managed large-scale databases for various client projects, focusing on user management and data persistence with Firebase.
- Developed cross-platform mobile applications using **Flutter**, delivering responsive and user-friendly interfaces.
- Adapted quickly to legacy code, updating and enhancing functionality for client-specific needs.

Software Engineer Intern

DevisionX

Aug. 2021 – Oct 2021

- Implemented and fixed over **50 bugs and features** across both backend and frontend systems using **React.js** and **Flask**.
- Learned new technologies such as **Docker**, **GCP**, and **Elasticsearch** to improve system performance and enhance the website's functionality within a short timeframe.
- Gained hands-on experience with cloud and containerized environments, contributing to a scalable infrastructure for AI-powered solutions.

PROJECTS

Visual Steering for Deep Neural Networks Using Explainable AI

Graduation Project 📄 🌐

- Developed a novel approach to integrate human knowledge with deep neural networks.
- Leveraged attention maps generated by **Grad-CAM** to highlight influential input regions.
- Applied the method to image classification datasets, achieving high accuracy.
- Contributed to the field of AI by enhancing interpretability and reducing biases.

Hadith Narrators

Freelancing ▶️ 🍏

- Developed a comprehensive app for exploring the **narrators of Hadiths** with **45,000+ narrators** and over **1 million Hadiths**.
- Designed a user-friendly interface, data scraping, and efficient backend management to support high-traffic usage.

Maqraa

Freelancing ▶️ 🍏

- Built an app dedicated to **Quran recitation** and **memorization**, enabling users to listen, review, and record recitations.
- Focused on smooth user experience with robust **backend** support and optimized for high scalability.

EDUCATION

Bachelor of Computer Engineering and Control Systems – GPA 3.54

Suez Canal University - 3rd of my class

Completed 2023
